PROFESSIONAL SUMMARY

I'm a budding UI/UX designer with a bit of hands-on experience creating clean, user-friendly designs. I enjoy figuring out how people interact with digital products and finding ways to make that experience better and smoother. I'm a good listener and communicator, which helps me work well with teams and understand what users really need. I naturally think through problems carefully and notice small details others might miss. I'm excited to keep learning and growing, and I'm always ready to bring fresh ideas and thoughtful design to any project.

EDUCATION

ASSAM DOWN TOWN UNIVERSITY

B.Tech in Computer science and technology
(Cloud technology and Information Security)
2023-27

PROJECTS

UI/UX DESIGNER

Innerly

- Focused on accessibility and readability, ensuring the app is inclusive and easy to use for people from diverse backgrounds and mental states.
- Collaborated with developers and content creators to ensure the design was both technically feasible and emotionally resonant.
- Applied thoughtful color palettes, soft visuals, and intuitive navigation to reinforce a sense of calm and reduce cognitive overload.
- Contributed to designing a clean and calming user interface aligned with the app's mental health focus, promoting a sense of ease and comfort for users.

CERTIFICATIONS

- Play it safe: Manage security roles by Google
 - Digital Transformation with Google Cloud
 - Foundations of Cybersecurity
